

# **Message from the Minister of Production of Peru**

“The Earth has been created perfectly and equilibrated, everything has logic and a dynamic harmony that is our responsibility to protect and govern, without CO2 in the right proportions, the Earth would be cold and with today’s excess the Earth is warming up with dramatic consequences.

**This is why I believe that the reforestation programme of Tolerance International UK is a valuable and much needed initiative to maintain this equilibrium.**

It is also up to us, in the little daily decisions, in a concrete change of our consuming habits and production, to carry out a big change in order to return the harmony to our only planet.”

**Rafael Rey**

Production Minister
